Dual SIM Cover iPhone 4/4s

Dual SIM Cover is a useful and handy accessory that allows you to make phone calls using two SIM cards with the same iPhone. In order to activate it, you simply have to select the SIM card you want to use through the configuration menu that appears on your screen. You can also set the timer function that allows you to configure the amount of time after which the two SIM cards have to switch. Installation is simple and does not require any additional applications or jailbreaks.

Unboxed
Dual SIM Circuit
Special protective cover
SIM adaptor kit to fit several SIM formats.
